

LEAN FORUM NORDVEST INVITERER TIL

OM ARRANGEMENTET

This workshop focuses on learning from theory and practice on how to do Benefits Management and how to make a real difference to the delivery of projects and programmes related to public and private projects.

Benefits are the reason why change is delivered, but too often projects are approached in isolation of benefits focusing on product delivery and lack the focus of delivering benefits. The workshop will also explore the wider aspects of benefits management that often are overlooked such as strategy management, performance management, change management and beyond. In addition, there will be presented two case studies and exercises on benefits management topics.

Per Svejvig, Department of Management, Aarhus University

Per Svejvig is Head of Project Management Research Group at the Department of Management, Aarhus University where he serves as associate professor. His research interests are in the area of Project Management and Project Studies, Benefits Managements, Project Value Creation, Rethinking Project Management, Project management of complex IS/IT projects, Virtual Project Management, Institutional theory in projects and Outsourcing.
